

Primary Engineer®

...the first step

ENGINEERS IN THE MAKING

WHO WE ARE:

Primary Engineer® is an educational not-for-profit that brings engineering into classrooms across the UK. We connect engineering and technology professionals with schools to provide real-world insight into engineering, challenge stereotypes, and broaden pupils' understanding of careers in the industry. Volunteers support our programmes and competitions to help inspire the next generation of engineers.

ENGAGEMENT OPPORTUNITY:

Primary Engineer® offers opportunities to support hands-on STEM projects for primary and secondary schools. Volunteers can get involved through teacher training, in-school engagement, and Celebration Events, helping bring engineering to life for pupils.

TRAINING DAY:

Where available, attend a local training day with teachers from programme enrolled schools and partner with them as they learn how to build and deliver the programme into the classroom. These sessions are delivered either in person or virtually with the opportunity to visit the school and support them thereafter.

IN SCHOOL ENGAGEMENT:

Following completion of training you can liaise directly with teachers to discuss a visit to the school and support the roll out of the programme with the pupils.

CELEBRATION EVENT:

Attend our Celebration Event where pupils from multiple schools put their engineering skills to the test through a series of challenges, as well as show off what they have learned by being interviewed by engineers.

Primary Engineer®

...the first step

There are several ways
of getting involved
throughout the school
year with varying hours
of engagement available:

Training Day:

Available: September to March

Time Commitment: 4-6 hours

In School Engagement:

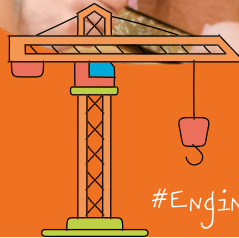

Available: September - June

Time Commitment: 1-3 hours

Celebration Event:

Available: February to July

Time Commitment: 4-5 hours

#EngineersInTheMaking

Young people cannot be what they cannot see. Being able to engage with engineering and learn that anyone can grow up to work in the industry can have a profound effect on them. So, if you want to be involved and help inspire the next generation of engineers get in touch today!

As recognition of your involvement, we welcome you as a Primary Engineer® **'Engineer Inspirer'**. We will support your involvement and provide you with recognition of engagement for your own professional development.
